4 Courses

Kafka Fundamentals

Kafka Architecture and Internals

Monitoring, Streams, and Connectors

Kafka Integration with Storm, Spark, Flume, and Security

Sep 5, 2024

Osamah Kenawy

has successfully completed the online, non-credit Specialization

Apache Kafka

This certificate is earned after successfully completing 4 courses on various topics in the Apache Kafka specialization. The learner understands the core concepts of Apache Kafka, including its architecture, features, and practical applications, and has practical experience with Kafka's internal operations, cluster administration, and reliability mechanisms, as well as the implementation and management of Kafka monitoring tools, stream processing with Kafka Streams, and integration with external systems using Kafka Connectors. The learner has developed skills in integrating Kafka with frameworks like Storm, Spark, and Flume, and implementing robust security measures. This specialization equips the learner with the knowledge and tools to effectively design, deploy, manage, and secure Kafka.
